

Top 5 Reasons

to Work as a **Clinical Information Manager (CIM)[®] / Scribe**
for Emergency Medical Associates

1. Build a Strong Foundation for a Successful Healthcare Career
2. Work in an Exciting Fast-Paced Hospital Environment
3. Enjoy Shifts that Allow for Life-Work Balance
4. Obtain Comprehensive Benefits: Health/Life/Vision/Dental/Tuition Reimbursement
5. Gain a Competitive Advantage when Applying to an Advanced Medical Degree Program

EMA CIMs have a **95%** acceptance rate to advanced medical degree programs.

"CIMs are a key contributor to the efficiency of the emergency department. They increase both physician and associate practitioner job satisfaction and are a vital part of the ED team." — **Christopher Freer, DO, FACEP; Chairman, Department of Emergency Medicine; Saint Barnabas Medical Center, Livingston, NJ**

"The CIM position is an extremely valuable opportunity, particularly for those interested in healthcare. Working as a CIM in a hectic ED honed my abilities to multitask, listen to specific physician's orders and write coherent legible patient charts, which has undoubtedly proved helpful during my clinical rotation as a 3rd year medical student." — **Jeannie Lui**

"I always knew I wanted to go into a medical profession and ultimately chose to become a physician assistant (PA). This job prepared me for school unlike anything else I could have done. Because I was already familiar with how the disease presents, what it looks like diagnostically, and how to treat it by working as a CIM, I was always ahead of the class." — **Dominika V. Rozanski, PA-C**
